

Helping you do the things that matter

Every day, we help millions of people and businesses. How? By carrying data securely and reliably on our award-winning voice and data network.

Our network's rated highly in the areas that count by trusted independent experts

Coverage

Voted the UK's best network for coverage in 2018 and 2019 (uSwitch)¹

Reliability

Rated the UK's most reliable network in 2018 (GWS)²

Speed

Download speeds with our new 2.3Ghz spectrum are 80% faster than our 4G average (Tutela)³

Security

The only UK provider whose mobile and WAN networks are CAS(T) certified⁴

We take care of your networking and connectivity needs

15,000+

O₂ Wifi hotspots UK-wide

250m

minutes connected every day

150m

texts delivered every day

60%

average data traffic growth across the network year on year

99%

UK 4G population coverage indoors

Our network connects the things all around you

Your home

Providing connectivity for the government's Smart Metering Programme, connecting **23.5m meters** in UK homes

Your safety

Providing voice & data for over **50%** of UK police forces, **12** ambulance services and **4** fire services

Your treats

Managing wifi and cashless payments in **1,200+** McDonald's branches

Your health

Helping health professionals at South London and Maudsley NHS Foundation Trust to extend patient treatment into the community with **secure mobile devices**

We continuously invest so you can do even more with our network

£523.6m

invested in spectrum in 2018

£2m

invested in the network every day

Investing heavily

in UK-wide commuter hubs like stations and airports

1042 rural locations

saw millions invested in 4G connectivity in 2018 so homes and business can enjoy better connectivity

We're reshaping the future with 5G

Transformed supply chains

Small, cheap, low power sensors will make it possible to **track every item** in every shipment, saving time and cost⁵

Virtual reality everywhere

Low latency will turn lifelike VR and AR experiences into the norm⁶

Remote healthcare

The NHS could save **1.1million GP hours** with teleconsulting and monitoring⁷

Smarter cities

Connected road systems will reduce traffic congestion by 10%, saving the economy **£880million/year**⁷

Join the organisations who trust our voice and data networks to help them connect, transact and grow.
